

TEMARIO PARA EXAMEN DE ADMISIÓN QUIMICA ORGANICA

2018

Temario de examen de admisión para ingreso al Doctorado en Tecnología Avanzada / CICATA-IPN Unidad Legaria

Temas:

1: Structure Determines Properties

Atoms, Electrons and Orbitals, Bond types: Ionic, Covalent, Polar Covalent, Electronegativity, Lewis Structures, Formal Charge, The Shapes of Molecules and Molecular dipoles, Constitutional Isomers, Drawing curly arrows, Resonance, Acids and Bases.

2: Hydrocarbon Frameworks. Alkanes Hydrocarbons, Bonding, Alkanes, Cycloalkanes, Thermodynamics and Stability Heats of reaction (combustion, formation, hydrogenation etc) and Hess's Law, Oxidation and Reduction,

3: Alcohols and Alkyl Halides

Functional Groups, Alcohols, Alkyl halides, Nucleophilic Substitution Reactions, Radical Substitution Reactions, Preparations of Alkyl Halides.

4: Structure and Preparation of Alkenes.

Elimination Reactions

Alkenes, Preparation of Alkenes, 1,2 Elimination Reactions

5: Stereochemistry

Isomer types, Stereoisomers, The Chirality Centre, Optical Activity, Absolute Relative Configuration, Cahn-Ingold-Prelog R/S notation, Fischer projections. Nucleophilic Substitution.
